

## ATTACHING CUSTOM METAL STANDS

1. Place the panel on its side

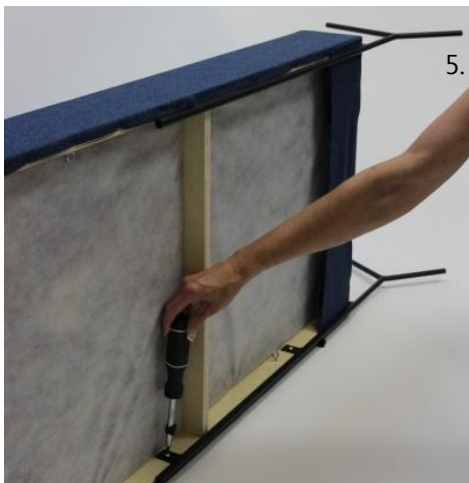

2. Position stand (leg) next to the panel

3. Be sure to position the support flush against the bottom of the panel

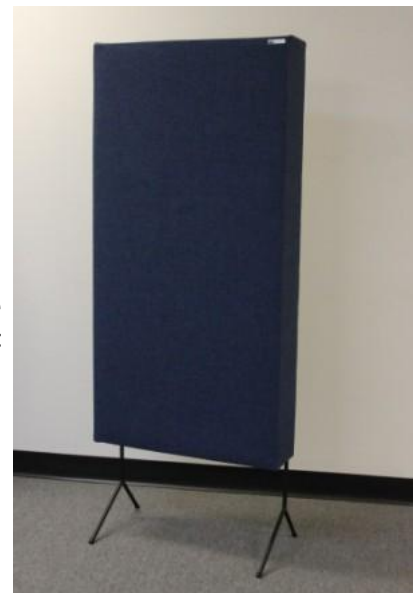

4. Attach the leg using the screws provided.  
*Note:* the screw tabs should be on the inside wood frame, hidden from view

5. Once you have completed the first leg, just flip the panel over and repeat steps 2 thru 4. AGAIN, be sure to position the support flush against the bottom of the panel.

6. Now you're ready to use the most effective acoustic treatment on the market!
